11	Upper (Outlet) Tube Sheet	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A

* Older units may have some additional items.

B&W PGG provides original equipment replacement parts for its Multiclone dust collector as well as its complete line of pollution control equipment.

Babcock & Wilcox Power Generation Group, Inc. (B&W PGG) is the original manufacturer of replacement parts, upgrade systems and air pollution control products formerly offered by Western Precipitation. The Multiclone® dust collector from B&W PGG is one of the most simple and efficient multiple tube cyclonic collectors available. It combines low maintenance, long collecting tube life, reliable operation and a modular design with the versatility to use in a variety of industrial or utility applications.

As the original equipment supplier, we offer complete support services and replacement parts for long-term operability and reliability. We have established a variety of methods for our customers to contact us for ordering, quotes, inquiries and other general requests for information:
