

Diamond Power® IK Series One Carriage Rebuild Kits

Complete OEM parts kits for rebuilding Diamond Power® IK Series One sootblower carriages are now available from Babcock & Wilcox (B&W).

These kits provide a comprehensive parts package for in-house rebuilding of your IK sootblower carriages (non-Diamond Power® Powertrain® carriages).

Each kit comes with the necessary critical wear components that are replaced during a normal B&W carriage rebuild, including:

- Bearings, shafts, rings, keys and spacers
- Seals and gaskets
- Lance hub
- Packing, bushing and gland
- Rollers

As always, B&W utilizes high-quality Diamond Power OEM parts.

Housing and top cover, change gear housing, carriage speed or motor gears, steam turn-on trip bar, and lance hub flange are **sold separately**, but can often be reused pending inspection.

In addition to the standard kit offerings, custom packaged kits can be tailored to meet your site's specific carriage rebuild needs.

Available IK Series One Rebuild Kits

357102-KITA: 2.375 in. dia. Feed Tube with 2-Stud Packing Gland
