

MillCare® Pulverizer Maintenance Services

Two world class mills, one universal maintenance program

Today, more than ever, pulverizer performance and reliability are essential to maintaining profitability in an aging power plant environment. That is why Babcock & Wilcox Construction Co., LLC (BWCC), a subsidiary of The Babcock & Wilcox Company (B&W), offers the MillCare® pulverizer maintenance program.

We will manage all of your mill needs, from inspections to complete rebuilds. The MillCare program combines our full range of pulverizer products and services into one complete, comprehensive package that integrates:

- Pulverizer design and engineering
- Field service engineers
- Supervision and project management
- Replacement parts

Under the MillCare program, pulverizer maintenance is no longer your concern – it is ours. We will customize a program to your specifications that aligns with the needs of your pulverizers and plant staff. Your program can include all regular maintenance, inspections, inventory management, parts, component installations, upgrades, rebuilds and coordinated management services, or any combination of those activities. The choice is up to you.

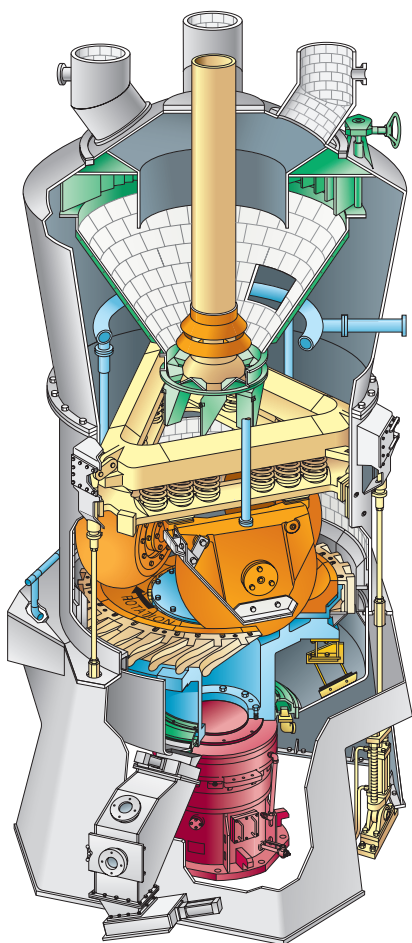

You may utilize your in-house maintenance crews as the source for MillCare labor, or you may choose to supplement your in-house labor with BWCC-supplied labor. We can also train your staff, keeping them informed and up-to-date on the latest technologies and operating procedures for your pulverizer equipment. Whatever you choose, we will work with you to provide years of optimized pulverizer performance and reliability.

Additional services included under the BWCC MillCare program

Both B&W Roll Wheel® pulverizers and E/EL pulverizers can be covered under the MillCare program. Today, these two B&W pulverizer designs continue to lead the way in grinding coal for utility boilers.

Rebuild and service capabilities for the E/EL pulverizers or B&W Roll Wheel pulverizers include:

- Component rebuild to current design standards
- On-site field services
- Inventory buyback program
- Parts stocking program
- Component exchange program
- Regional service centers
- Construction and maintenance
- On-site machine services
- Abrasion- and erosion-resistant coatings
- Research and development of new technology

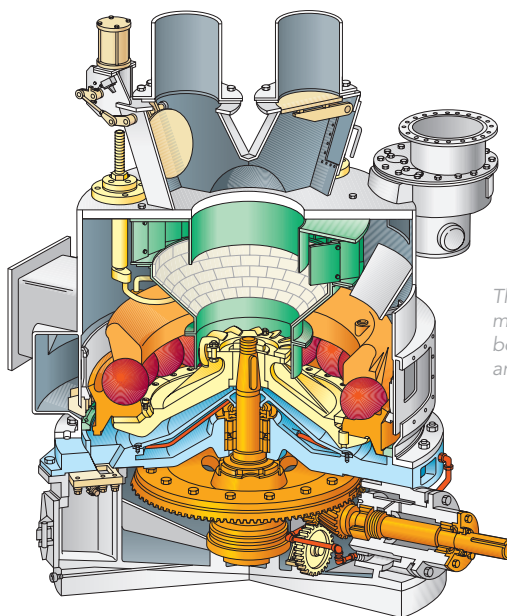

Assured Stock Program® inventory management

As a MillCare pulverizer maintenance service customer, your pulverizer part requirements will be treated as an Assured Stock Program® participant. B&W's Assured Stock Program inventory management system is a proven strategy designed to enhance your purchasing and inventory functions. The program can reduce the overall cost of obtaining parts while significantly improving replacement part availability. The program is customized to incorporate your specific requirements and assures part availability whenever and wherever they are needed.

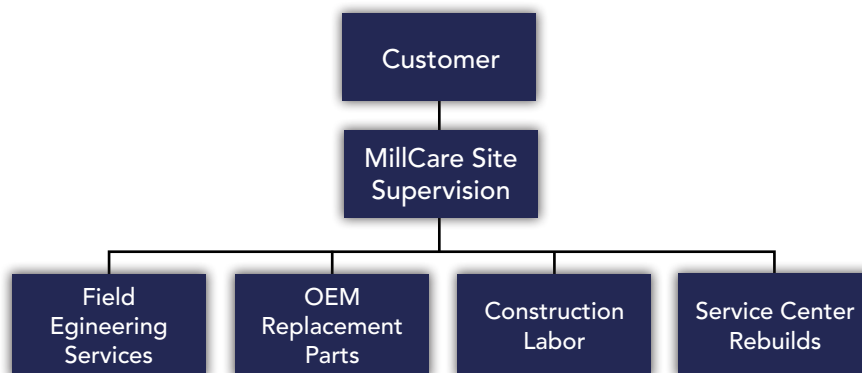

The Assured Stock Program inventory management system is customized to incorporate your specific requirements and ensures parts availability whenever and wherever they are needed.

The MillCare pulverizer maintenance service is available for both B&W Roll Wheel® pulverizers and E/EL mills.

Maintenance type	Scheduled outage Routine inspection Forced outage Daily maintenance	BWCC provides BWCC provides BWCC provides Negotiable
Pricing	Firm \$ rate/ton of coal ground	
Contract span	5 years plus	
Warranty	Labor Parts	BWCC provides BWCC provides
Incentives	Negotiable	
Guarantee	Mill performance Mill availability	BWCC provides Negotiable

BWCC assigns a company representative to function as a liaison between the customer and the appropriate MillCare pulverizer service.

A wide range of pulverizer remanufacturing services is available at B&W's regional service centers to meet your needs while minimizing lead times.

Regional service centers

B&W has regional service centers located throughout the country to provide immediate response for scheduled and unscheduled outages. The service centers can customize a wide range of rebuild and refurbishing services to meet your specific needs while minimizing lead times. Our service centers are supported by highly qualified design, engineering and manufacturing personnel to ensure component quality.

B&W's regional service centers provide accessibility, quality parts, and reliable, cost-effective services, which are all part of our continuous commitment to customer satisfaction.

Field engineering services

To keep your mills running at peak condition, our MillCare program includes B&W field engineering services support to perform:

- Inspections
- General maintenance planning and direction
- Recommendations for operating improvements and upgrades
- Maintenance program audits and reviews
- In-plant training

Our field engineers are among the most knowledgeable pulverizer and boiler specialists in the world, and are experts on equipment manufactured by B&W. All aspects of pulverizer operations and maintenance are analyzed and reported to the customer. Potential performance improvements to current equipment standards are based upon their preliminary inspections and expert recommendations.

Our many years of field experience give us the technical knowledge and necessary skills to provide cost-effective solutions to pulverizer problems.
