**B&W Roll Wheel™ Pulverizer**

**Type:**
Vertical, air-swept roll-and-race.

**Design features:**
Loading system allows independent radial movement of each roller; maintains design performance with up to 40% weight loss of roll wheel tires; stationary or variable speed rotating dual stage classifiers; non-integral gear drive.

**Capacity:**
17 to 115 t/h (15 to 104 ton/h).
EL Pulverizer

Type:
Vertical, air-swept ball-and-ring, or ball-and-race.

Design features:
Compact design; maintains performance with up to 80% weight loss of balls; stationary or variable speed rotating dual stage classifiers.

Capacity:
Up to 23 t/h (21 t/h).
