

# Wet Flue Gas Desulfurization Scrubber WET FGD

**Design features:**

Spray tower scrubber used for SO<sub>2</sub> control, with a proven tray design for more uniform flue gas distribution and improved absorption.

**Applicable boiler sizes:**

50 MW to 1300 MW.

**Removal efficiencies:**

To 99%.

**Reagents:**

Primarily limestone; also lime, magnesium-enhanced lime, sodium carbonate and ammonia.

**Fuels:**

All solid fuels — primarily coal.
