

Site Services for Diamond Power® Boiler Cleaning and Allen-Sherman-Hoff® Material Handling Products

Through a dedicated team of professionals, Babcock & Wilcox (B&W) provides quality onsite services focused on the proper operation and maintenance of your boiler cleaning and material handling systems.

Our complete turnkey services encompass all onsite installation and project management activities, which include: necessary labor, equipment, tools, and consumables, all performed with qualified technical oversight throughout the project.

Features and benefits of our dedicated approach to Site Services

Quality Using OEM replacement parts, along with expert knowledge of the equipment, we take the guesswork out of on-site repair/replacement projects. If a problem arises, it can be quickly resolved.

Expertise No other mechanical contractor can match our product knowledge or engineering support. We've completed hundreds of repair and replacement projects at numerous utility, pulp & paper, petrochemical, and industrial plants. We can help you keep your equipment running at optimal performance.

Safety We promote Target Zero as a corporate-wide process that helps us ensure a safe work environment for everyone ... managers, supervisors, employees, subcontractors, vendors and customers.

Project Management We can manage every aspect of the process, from initial walk down and proposal generation to installation and final commissioning, offering one point of contact for the entire turnkey project.

Skilled Labor We use highly skilled non-union craft labor and qualified in-house field service technicians for on-the-job oversight.

Parts & Labor Warranty We stand behind the integrity of our products and services and offer competitive warranties on materials and workmanship.

Project Structure Our wide range of pricing options – time and materials, estimated not to exceed, or firm fixed price – can be tailored to fit the approach which works best for your organization.
